## Notice Regarding Establishment of Tokyo R&D Center

Asahi Intecc announces that the establishment of “Tokyo R&D Center” at Haneda Innovation City (Ota-ku, Tokyo) as an R&D and open innovation base for next-generation medical device technologies.

With the establishment of “Tokyo R&D Center”, in addition to strengthening the existing development function mainly in guide wires and catheters, Asahi Intecc believes that the center will make a significant contribution to the improvement of the development capability of medical devices as a development base for advanced technologies that lead to smart medical treatment (Note) and medical robotics, as well as an R&D base in the Tokyo area.

(Note) A general term for medical treatment performed using medical devices, such as smart guide wires, with advanced functions added to conventional products.

### 1. Overview of Tokyo R&D Center

- |                           |  |
|---------------------------|--|
| (1) Name                  | Tokyo R&D Center   |
| (2) Location              | HANEDA INNOVATION CITY 1-1-4, Haneda Airport, Ota-ku, Tokyo                        |
| (3) Purpose of the base   | R&D base for next-generation medical device technology, open innovation base, etc. |
| (4) Date of establishment | Scheduled for February 2022  |
| (5) Base area             | 1,790.25 m <sup>2</sup>  |

### 2. Impact on Future Business Performance

As the establishment of Tokyo R&D Center is scheduled for February 2022, the impact of the establishment of this base on the consolidated business performance of Asahi Intecc Group will be minimal.
