Notice Regarding Conclusion of Sales Alliance Agreement with Kaneka Corporation for “Brain Aneurysm Embolization Coil” in the U.S. Market

Asahi Intecc Group announces that it has concluded sales alliance agreement with Kaneka Corporation for the new brain aneurysm Embolization Coil (Note) (product name: i-ED COIL™) in the U.S. market, which has been marketed by Kaneka Corporation.

1. Details of the Sales Alliance

The i-ED COIL™, a new product of Kaneka Corporation (Kaneka) with the best-in-class level of coil flexibility, was launched in the Japanese market in November 2019 and in the U.S. market in September 2020. The product has been praised highly in reducing the rupture risk of aneurysms by Japanese neurosurgeons.

Asahi Intecc Group has signed an agreement with Kaneka that ASAHI INTECC USA, INC., a consolidated subsidiary of Asahi Intecc will support the sales of i-ED COIL™ in the U.S. market from August 2021.

Through this sales alliance, Asahi Intecc will strengthen the Group’s sales structure for neurovascular products in the U.S. market.

(Note) A medical device used in the treatment of brain aneurysms. It is deployed into the aneurysm through a catheter to prevent blood flow into the aneurysm. A brain aneurysm is a bump that develops in an artery of the brain, and if it ruptures, it can cause subarachnoid hemorrhage.

2. Overview of Kaneka Corporation
